

MCi Acquired by Mega Industries

Micro Communications (MCi) acquired by Mega Industries of Gorham, Maine. This acquisition brings together the legacy product lines of MCi and Mega – creating a global leader in high-power components and systems that is dedicated to delivering innovative broadcast RF solutions and products to its customers. Previously, Mega acquired the FXR dummy load product line – formerly of Microlab. With MCi acquired by Mega Industries, this acquisition indicates another phase of Mega Industries market and product expansion plan.

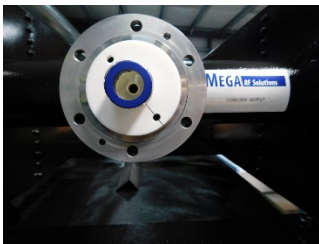

Mega Industries is a manufacturer of microwave and RF components in waveguide, coax and ultra-high vacuum configurations based in Gorham, Maine. The team at Mega is excited for product integration and collaboration between MCi and Mega Industries legacy products. With additional engineering capabilities and production capacity resulting from this merger – the combined company will further its leadership position in the Broadcast market.

The MCi brand and organization is recognized globally for its innovative solutions in the broadcast industry. The acquisition gains MEGA direct access to an important global market segment.

The combination of MCi and Mega product lines will continue to provide innovative RF equipment that allows terrestrial, over-the-air TV and enable radio broadcasters to deliver reliable service. The current customers of MCi will continue to be served by the combined Mega / MCi staff and there will be no disruptions to any orders in process.

About Mega Industries

Mega Industries is a global leader in the manufacture of high-power microwave transmission equipment. The product lines at Mega include rigid and flexible waveguide sections, coaxial transmission line, ultra-high vacuum waveguides, and a wide line of microwave components. From couplers and loads to combiners and transitions – Mega Industries is a trusted name in microwave technology since 1989.

Mega Industries years of innovation and specialization in high-power applications separate Mega from traditional microwave component suppliers. Mega takes concepts from sketch to delivered solutions. The advanced microwave and RF engineering teams at Mega, focus their efforts with a customer-centric approach. Mega Industries clients range from defense radar manufacturers to international high-energy physics laboratories – to medical research facilities, radio, and television broadcasters, and beyond.
